HINGED COVER SUBMERSIBLE POLYESTER ENCLOSURES

The 5600 ESPLH are suited for use indoors or outdoors where corrosion is a problem, to protect the enclosed equipment from water coming from any direction, dust, dirt and oil. The 5600 ESPLH is made of a polyester and polycarbonate hybrid blend, aesthetically designed and produced exclusively by EXM. It is the material of choice for numer-

ous industrial applications. Its electrical, chemical and physical properties allow to be used in many environments and for a wide variety of applications. A high quality molded gasket ensures a complete NEMA 6P seal. The cover screws are made of stainless steel. The body of the 5600 ESPLH enclosures incorporates mounting holes.

Enclosures can be completed with an optional 14 GA galvanized inner panel, which can be mounted in the rear of the enclosure or on the cover. Cover screw inserts can be removed and replaced by quick release latches (see p.398).

**CSA Certified / UL Listed
NEMA/EEMAC 6P / IP68**

The 5600 ESPLH
Available only from EXM
