5412 ESSBU

WATER, OIL, DUST TIGHT STAINLESS STEEL BUTTABLE ENCLOSURES

The 5412 ESSBU water, oil & dust tight enclosures are used indoors or outdoors, in areas where a corrosion problem exists or where the enclosures may be subject to hosing or water coming from any direction, or for protection against dust, dirt or oil splashing. The 5412 ESSBU are made of high quality 14 GA or 16 GA (Type 304) stainless steel, with continuously welded corner seams. The opening has a curled lip around all sides to increase

rigidity and prevent dripping water from entering the enclosure when the door is open. A high quality, robotically poured-inplace, seamless gasket ensures a complete and durable water tight seal. **The hinges are arranged to allow the installation of rows of enclosures, side by side.** A ¼ turn locking mechanism (or 3 point latch system on larger enclosures) ensures positive closing. Internal mounting holes are provided. **Each enclosure**

sure comes complete with a 12 GA galvanized inner panel, which is double bent* for maximum rigidity and mounts on M8 welded studs. The enclosures are brushed smooth. Inner panel is galvanized (other colors available).

**CSA Certified / UL Listed
NEMA/EEMAC 4X / IP66**

Refer to p.734 to validate choice of substrate for the application
