### **FEATURES**

- ► Fully Encapsulated Plastic Case for PCB, Chassis and DIN-Rail **Mounting Version**
- ► Universal Input 85~264VAC, 47~440Hz
- ► I/O Isolation 4000VAC with Reinforced Insulation
- ➤ Operating Ambient Temp. Range -40°C to +80°C
- Overload/Voltage and Short Circuit Protection
- ► EMI Emission EN 55011/32 Class B Approved
- EMC Immunity EN 61000-4-2,3,4,5,6,8,11 Approved
- ► Medical EMC Standard with 4th Edition of EMI EN 55011 & EMS EN 60601-1-2 Approved
- ► Medical Safety with 2xMOPP per 3rd Edition of IEC/EN 60601-1 & ANSI/AAMI ES60601-1 Approved
- ► UL508 Safety Approval Specifically for Industrial Application
- Risk Management Report Acquisition according to ISO 14971
- ► UL/cUL/IEC/EN 62368-1(60950-1) Safety Approval & CE Marking

### PRODUCT OVERVIEW

Introducing the MINMAX APM-40 series - an innovative lineup of fully encapsulated AC-DC power modules designed to meet the highest standards in performance, safety, and reliability. Engineered to excel in challenging environments, these high-performance products boast an extended operating temperature range of -40°C to +80°C, ensuring optimal functionality in diverse applications.

With a universal input voltage of 85-264VAC and comprehensive safety approvals, including UL/IEC/EN certifications for medical safety and UL 508 listing, the APM-40 series is well-equipped for integration into products targeting global markets. These power supply modules have also earned the EMI Emission EN 55011/32 Class B approval, attesting to their compliance with stringent electromagnetic interference standards.

In alignment with ISO 14971 Medical Device Risk Management, the APM-40 series undergoes a rigorous risk assessment process. This ensures that these power modules not only meet the demanding criteria for performance but also adhere to safety benchmarks outlined in ISO 14971. In summary, the APM-40 series power modules provide an ideal solution for a wide range of space-critical applications in commercial, medical, and industrial electronic equipment.

### Notes

- 1 This product is not designed for use in critical life support systems, equipment used in hazardous environment, nuclear control systems or other such applications which necessitate specific safety and regulatory standards other the ones listed in this datasheet.
- 2 Specifications typical at Ta=+25°C, resistive load, 115VAC, 60Hz input voltage, after warm-up time rated output current unless otherwise noted.
- 3 Ripple & Noise measured with a  $0.1\mu F/50V$  MLCC and a  $1\mu F/50V$  Aluminum electrolytic.
- 4 Safety approvals cover frequency 47-63 Hz.
- 5 We recommend to protect the converter by a slow blow fuse in the input supply line.
- 6 Other input and output voltage may be available, please contact MINMAX.
- 7 Specifications are subject to change without notice.
- 8 The repeated high voltage isolation testing of the converter can degrade isolation capability, to a lesser or greater degree depending on materials, construction, environment and reflow solder process. Any material is susceptible to eventual chemical degradation when subject to very high applied voltages thus implying that the number of tests should be strictly limited. We therefore strongly advise against repeated high voltage isolation testing, but if it is absolutely required, that the voltage be reduced by 20% from specified test voltage. Furthermore, the high voltage isolation capability after reflow solder process should be evaluated as it is applied on system.

NC: No Connection

- ► All dimensions in mm (inches)
- ➤ Tolerance: ±0.5 (±0.02)
- ► Pin pitch tolerance: ±0.25 (±0.01)
- ► Pin diameter tolerance: X.X±0.1 (X.XX±0.004)

### **Physical Characteristics**

Case Size : 88.9x63.5x30.0mm (3.50x2.50x1.18 inches)
Case Material : Plastic resin (flammability to UL 94V-0 rated)

Pin Material : Copper Alloy
Weight : 310g

### Package Specifications Chassis Mounting with screw terminal (order code suffix C)
