"Classic" 600 Ohm 119DA Series

Speaker Matching Transformer

Or it can also be used for driving "classic" high impedance speakers used with newer equipment. Simply turn the 119DA around - swaping primary for secondary (ie...4 or 8 ohm input - with 600 ohms out).

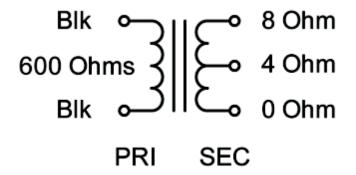

Features

- Manufactured with high quality 29M6 laminations (for low distortion)
- · Concentric wound for excellent coupling
- Isolation type transformer (ie...separate primary and secondary)
- Primary: 600 Ohms (using 6" wire leads)
- Secondary: 8 Ohms with a 4 Ohm center tap (using solder lugs)
- Power: Rated at 12 watts
- Frequency response: 30 Hz. 20 Khz. (+/- 1 db @ Full Power 1 Khz. Reference)
- Weight: 1 pound, 4 oz.
- Mounting: 2 hole bracket mount on 2 & 13/16" mounting hole centers
- Cost: under \$40.00 U.S.!
- IN STOCK check out our Classic Distributors.

	Overall Dimensions			Two Hole	Mounting
Part No.	Height	Width	Depth	Mounting Centers	Hole
119DA	2.00	3.28	2.35	2.81	0.19
